

## PRESS RELEASE

### AIR BRAKE HOSE ASSEMBLIES FOR IMMEDIATE RELEASE

Velvac is pleased to announce that it is expanding its offering of air brake hose assemblies manufactured in its North American assembly plant.

Velvac has been assembling standard one end fixed and one end adapted swivel assemblies for years. Beginning in 2023, Velvac added several new styles of air brake hose assemblies to its offering. The new styles of hoses are brass dual live swivel hoses, which both eases and shortens installation time over conventional hoses and composite dual live swivel hose assemblies. Composite dual live hose assemblies reduce the cost of the hose fittings and allow for less corrosion on the hose assemblies fitting end. Velvac is an 88 year old company, manufacturing quality components for the Heavy Duty Trucking industry.

Velvac is an IATF 16949 and ISO 140001 certified multinational company and a known truck industry leader in mirror and brake system manufacturing with a large footprint in the truck Aftermarket.
